JOSEPH OLAMILEKAN ADENIJI

Guildford, Surrey | 07343 125132 | sephniji@gmail.com

PROFESSIONAL SUMMARY

Cyber Security master's student at the University of Surrey, on the Professional Postgraduate Year pathway and seeking a 12-month information security placement from July 2027. Engineering graduate with an MIT xPRO certificate in full-stack development, and hands-on experience protecting sensitive data, monitoring networks and handling restricted information. Currently building practical defensive skills through TryHackMe's Cyber Security 101 path, with a particular interest in security monitoring, incident response and threat management.

EDUCATION

MSc Cyber Security with Professional Postgraduate Year
University of Surrey, Guildford, UK | 2026 – 2028 (expected)
Includes a 12-month professional placement year (2027 – 28)
Relevant modules (Semester 1): Architectural Thinking for Security, Cryptography, Digital Forensics, Secure Systems and Applications

Bachelor of Engineering
Kwara State University (KWASU), Ilorin, Nigeria | 2023 – 2025

CERTIFICATIONS & TRAINING

Cyber Security 101 Learning Path
TryHackMe (Online) | In progress
Hands-on labs covering networking, cryptography, Linux, Windows and Active Directory, and offensive and defensive security tools

Professional Certificate in Coding: Full-Stack Development
Massachusetts Institute of Technology (MIT) xPRO (Online) | May 2024
Key modules: Python, Systems Architecture, Data Security, Encryption, Backend Frameworks

PROJECTS

Joe Bank: Full-Stack Banking App and Security Review
github.com/Jophizz/joe-bank | Built 2024, reviewed November 2026

- Built a banking web app (React, Node.js, Express, MongoDB, Docker) with sign-up, login, deposits, withdrawals and transaction history, using bcrypt password hashing and JWT-protected routes.
- Reviewed the code as a security student, found a token-signing secret exposed in a public configuration file, moved it to an environment variable and documented further fixes, including login rate limiting and shorter sessions.

TECHNICAL SKILLS & COMPETENCIES

Security & Controls	Cryptography and encryption principles, data protection, network monitoring, confidentiality & privacy compliance, secure digital archiving
Systems & Technology	Systems architecture, secure systems design, systems migration, full-stack development principles, Python
Data & Reporting	Data reconciliation, data integrity, technical reporting, Microsoft Excel (advanced auditing & cross-referencing)
Core Competencies	Analytical problem-solving, cross-functional collaboration, information asset management, attention to detail, adaptability

PROFESSIONAL EXPERIENCE

Technical IT Assistant
Adeq Integrated Hydrogeophysical and Drilling Services, Nigeria | July 2025 – August 2026

- Audited internal data streams to enforce strict confidentiality and user privacy compliance standards.

Data & Assets Officer
Nigeria Electricity Liability Management (National Youth Service placement), Nigeria | May 2022 – May 2023

- Conducted network monitoring and managed the secure scanning, indexing and digital archiving of restricted liability documents to prevent unauthorised access.
- Used advanced Microsoft Excel features to cross-reference, audit and reconcile high-value legacy financial claims.
- Supervised the migration of physical and digital assets from legacy facilities to new corporate offices, with zero data loss.
